

Matteo Bianchi

ENGINEER - OPEN SOURCE COMMUNITY LEADER - AMSTERDAM BASED, OPEN TO US RELOCATION

✉ matteo@mb-consulting.dev |  [mbianchidev](#) |  [mbianchidev](#) |  [mbianchidev](#)

Skills

Cloud	GCP, AWS, Azure, Kubernetes, ArgoCD, FluxCD, Grafana, Prometheus, OpenTelemetry, Cilium, Istio
Platform/SRE	Terraform (OpenTofu), Ansible, Puppet, Jenkins, Dynatrace, Datadog, PagerDuty, Splunk
Code	Python, Typescript (React, Nextjs, Nodejs), Golang, Bash, Java (Spring, Quarkus)

Experience

Solutions Engineer, Corporate (EMEA)

Netherlands (remote)

GitHub

2024 - now

- Moving the pre-sales and post-sales motions for customers averaging 500 developers - 121% quota reached in the first 8 months.;
- Close collaboration with Sales, Field Marketing, Product and OSPO - delivered talks at international industry and OSS conferences.;
- Created an internal OpenClaw-style assistant for Solutions Engineers, automating 20-25% of the work;

CEO & Founder

Europe, EU (remote)

SyncTune

2021 - now

- Advising startups through public companies on developer-platform strategy, CI/CD, observability, and supply-chain security;
- Cut 30-40% of cloud costs optimizing storage, compute configuration and egress traffic, contextually improved app performance by 15-20%;
- Lowered bugs and incident impact of about 30% via new CI/CD pipelines, observability, alerting and supply chain security practices;
- Delivered Platform Engineering and Kubernetes courses to more than 300 alumni with a surveyed CSAT of 95%;
- Offering fractional DevRel and OSPO services for startups (including YC funded ones);

CTO & co-founder

Netherlands (hybrid)

KubeLab

2022 - 2023

- Laying down the foundation of the internal Kubernetes Platform, from idea to MVP, driving both tech and business strategy;
- Engineering management of 7 remote engineers, external relations with potential investors and stakeholders, 200k € pre-seed raised, xxxk ARR reached;

Staff DevOps Engineer | Site Reliability Engineer | Platform Engineer

Italy (hybrid)

InfoCert (Tinxeta Group)

2018 - 2021

- Lead of a 5-people DevOps Engineering team, managing cloud infra for a product with 8+ million daily users in EU, NA and LATAM;
- Built platform APIs and zero-touch onboarding used by 70+ engineers across six product teams
- Saved an estimated of 10M+ € in costs avoiding SLA breaches when operating as SRE;

Senior Software Engineer

Italy (on site)

Various IT Companies

2015 - 2018

- Worked for a number of IT companies, in different verticals, mostly as fullstack PHP (Laravel), Java (EJB+JSP) and Linux sysadmin;

Projects

Kubernetes Open Source - Release Engineering, Former Release Team Member

kubernetes/kubernetes

- Release member since Kubernetes v1.31, until v1.34 - currently a maintainer of Release Engineering
- Branch manager for v1.33, v1.34 and Comms Release Lead in v1.32

International Speaker - Event Organizer - Lecturer

Community Work and Public Speaking

- Speaker, program committee and organizer of events in the OSS and Cloud Native space - Guest Lecturer at the University of Turin.

Platform Engineer for ChangeGamers - Computational Pathology Research

Nederlandse Kanker Instituut - Antoni van Leeuwenhoek (NKI-AVL)

- Supporting computational pathology and ML/AI workloads to train image pattern recognition models on biopsy data on Azure AKS and bare metal k8s

About me

I am a martial artist, willing to go far to reach objectives; former eSport player leading my team to victory thanks to a fast reaction time to any change; content creator with a passion for personal finance able to plan for the long run; a musician, naturally inclined to find creative solutions to complex problems.
